

ENVIRONMENTAL PROTECTION AT **SIMONS VOSS**

Sustainability inside!

 The finest in keyless security

Simons Voss
technologies

ADDED VALUE THROUGH INCREASED SUSTAINABILITY AND ENVIRONMENTAL PROTECTION

Naturally, we at SimonsVoss also know that our work has an impact on the environment. That's why environmental protection and sustainability are an important part of our corporate policy. After all, together we all bear a responsibility towards our society and the environment. We want to harmonise profitable production with environmental protection, the prevention of emissions, the reduction of fossil fuel consumption and a significant improvement in waste and hazardous substance management.

For SimonsVoss, the successful integration of high-quality, state-of-the-art locking technology and environmentally-oriented working practices is the key to the technology of the future.

AND WE ARE CONSTANTLY IMPROVING

Our company philosophy commits us to continuously improve in terms of environmental protection. We constantly monitor our energy and material flows and use this information to identify potential for improvement. In addition to ISO 9001 certification, we are also certified in accordance with ISO 14001 for environmental management.

KNOWLEDGE IS THE FUTURE

Sensitising and training our employees on the subject helps us to create a future for SimonsVoss that is more sustainable and environmentally aware. If we all work towards this goal, we will create more environmental awareness among ourselves and more environmentally friendly, sustainable products for our customers.

REACH, RoHS and WEEE

Avoiding toxins and harmful components in the manufacture of devices and products and disposing of electronic equipment in accordance with European standards and laws is our top priority.

LONGEVITY

We are combating the throwaway mentality through the quality of our products, downward compatibility and high battery efficiency (standard battery service life of up to 10 years), thus helping to use resources as long and effectively as possible.

EMISSION REDUCTION

Our environmental balance and ecological footprint are important to us. At our production facility in Osterfeld, for instance, we have already actively committed ourselves to sustainability. The building is made of wood and is operated as sustainably and environmentally friendly as possible.

WASTE PREVENTION

In order to reduce waste, we are increasingly using shuttle packaging in delivery and supplier traffic and offer bulk packaging for suitable products. In addition, we mainly use cardboard packaging and do not use additional colouring.

MADE IN GERMANY

In terms of quality and longevity as well as for the sake of resource conservation, the fact that our products and software solutions are developed and produced in Germany also has a positive effect on our environmental balance.

This is SimonsVoss

SimonsVoss, the pioneer in remote-controlled, cable-free locking technology provides system solutions with a wide range of products for SOHOs, SMEs, major companies and public institutions. SimonsVoss locking systems combine intelligent functionality, high quality and award-winning design Made in Germany. As an innovative system provider, SimonsVoss focuses on scalable systems, high security, reliable components, powerful software and simple operation. As such, SimonsVoss is regarded as a technology leader in digital locking systems. Our commercial success lies in the courage to innovate, sustainable thinking and action, and heartfelt appreciation of employees and partners.

SimonsVoss is a company in the ALLEGION Group, a globally active network in the security sector. Allegion is represented in around 130 countries worldwide (www.allegion.com).

Made in Germany

SimonsVoss is truly committed to Germany as a manufacturing location: all products are developed and produced exclusively in Germany.
