THE **SimonsVoss** PROMISE

We paved the way for digital locking technology more than twenty years ago. Since then, we have pursued a clear aim with our systems: intelligent security. This aim is achieved through our firm commitment to high quality, reliability and innovation and our pledge to finding a sustainable answer to each individual security requirement.

Our customers want a contemporary, future-proof solution for access control and locking excellence. We have everything to provide it to them:

- ⌘ Sophisticated, modular locking systems and an extensive product portfolio
- ⌘ System components which are backward- and forward-compatible with no limitations
- ⌘ Low-maintenance technology which works easily and on a lasting basis
- ⌘ A support service which is proficient, friendly and swift to arrive

COME IN!

Open flexibly, lock securely, manage easily.

Only modern digital locking technology can meet these requirements. SimonsVoss locking systems unite security, convenience and flexibility in a premium quality solution. Control all locking devices and access rights promptly and centrally. Extend your locking system door by door, building by building – quickly, easily and precisely to your requirements.

As a pioneer in cable-free, radio-controlled locking technology, we are continuing to drive progress forward – with systems that are optimised to requirements and innovative system components such as digital identification media, intelligent cylinders and fittings.

KEYLESS WORLD – WITH THE INTELLIGENT FITTINGS FROM SIMONS VOSS

Digital access control for doors in new and existing buildings

With SmartHandle 3062 and SmartHandle AX, SimonsVoss offers two variable, intelligent fittings for exterior and interior doors. Not only do they contain digital and technical sophistication – they are also elegant eye-catchers without being too obtrusive visually.

As with all SimonsVoss locking components, the intelligent SmartHandle 3062 and SmartHandle AX fittings are optimum quality in terms of material, technology and design. They can be retrofit, networked and operated with established identification media at any time. This is possible thanks to the backward and forward compatibility in all SimonsVoss system components: First-generation transponders can even lock the latest system platform's SmartHandle AX.

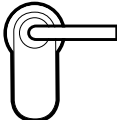

// Combining flexibility and security

With intelligent functions such as online door monitoring, adaptive design and a wide range of options, the intelligent fittings meet the highest demands for flexibility. Minimum power consumption and the combination of durable, robust mechanics with modern technology, all German-made, ensure cost efficiency.

DESIGN YOUR KEYLESS WORLD WITH INTELLIGENT FITTINGS FROM SIMONS VOSS

SMARTHANDLE AX

Next Keyless Generation:
the intelligent fitting for interior doors

SmartHandle AX is just the start of the new, even more powerful generation of SimonsVoss system components: "Next Keyless Generation".

Greater security, greater convenience, greater intelligence: the new SmartHandle AX achieves a new quality standard, a new addition to the SimonsVoss fitting portfolio since 2018.

// Increased access security and performance

The innovative security architecture is a decisive advantage in SmartHandle AX. The Secure Element, a separate unit, is highly efficient in saving and encrypting all security-relevant data, such as the locking system password.

// Cable-free online door monitoring

Sensitive areas can also be equipped with DoorMonitoring* on request. Controlled by a sensor, the cable-free online

door monitoring system records, logs and reports all door statuses – whether the door is open, locked or left open too long. It also sends an alert for critical events.

// Adaptive design, flexible layout options

SmartHandle AX has a modular structure. This means it can be flexibly adjusted to all door installation types with regard to door thickness, centres distance and spindles. The lever can be fitted on the left or right. It provides unique scope for visual design with different SimonsVoss handles and can be combined with standard handles by renowned manufacturers – a first that only SimonsVoss offers.

Different SimonsVoss handle variants and different coloured finishes

Proven durability capacity for 1 million cycles (EN 1906)

Battery life for up to 300,000 operations or up to 10 years on standby

Can be combined with handles from well-known manufacturers

Can be networked online and virtually

Administration of up to 64,000 media

Modular design: door thickness, centres distance and spindle are adaptable. The lever can be fitted on the left or right

* Scheduled to be available in 2023

Simons Voss

Intelligent, beautifully
designed and durable:
The SmartHandle AX
impresses with a
battery life for up to
300,000 operations

Modular, secure and flexible – as a stationary version
with the option for mechanical secondary locking device

... or as a suspended version

SmartHandle AX –
in interiors for
metal frame doors
from a width of 65 mm.
Also suitable for
fitting oval escutcheons.

Can also be combined with a push bar

SMARTHANDLE 3062

The classic for exterior doors

SmartHandle 3062 reliably controls large visitor flows. It is weather-resistant, works without cables and can be mounted without drilling within minutes with a single screw using the patented snap-in process.

// Increased anti-burglary protection

SmartHandle demonstrates its intelligence on doors used by many different visitor groups. It can control up to 64,000 people according to place, time and individual authorisation. As the electronics are on the inside of the door, the SmartHandle is extremely burglar resistant.

// Cable-free online door monitoring

Sensitive areas can also be equipped with Door-Monitoring. Controlled by a sensor, the cable-free online door

monitoring system records, logs and reports all door statuses – whether the door is open, locked or left open too long. It also sends an alert for critical events.

With its elegant, multi-award-winning design, the intelligent fitting matches a wide variety of door types on a visual level. It accepts transponders or SmartCard locking media and can be easily retrofit and networked at any time.

Administration of up to
64,000 media

Drill-free
Snap-in installation

Battery life up to
150,000 locking operations

Different SimonsVoss
handle variants and cover widths

Weather resistance
for exterior doors

Increased, certified
burglary protection

DoorMonitoring – cable-free online door monitoring
For sensitive areas with alarm alert for critical events.

Simons Voss

The classic for the exterior door – weather-resistant, wireless and drill-free installation using the patented snap-in method.

Security – in your own hands.
Increased burglary protection as per
PAS 24, SKG and ESI certification

Comfort meets security and design:
The elegant door fitting harmonises
visually with different door types.

This is SimonsVoss

SimonsVoss, the pioneer in remote-controlled, cable-free locking technology provides system solutions with a wide range of products for SOHOs, SMEs, major companies and public institutions. SimonsVoss locking systems combine intelligent functionality, high quality and award-winning design Made in Germany. As an innovative system provider, SimonsVoss focuses on scalable systems, high security, reliable components, powerful software and simple operation. As such, SimonsVoss is regarded as a technology leader in digital locking systems. Our commercial success lies in the courage to innovate, sustainable thinking and action, and heartfelt appreciation of employees and partners.

SimonsVoss is a company in the ALLEGION Group, a globally active network in the security sector. Allegion is represented in around 130 countries worldwide (www.allegion.com).

Made in Germany

SimonsVoss is truly committed to Germany as a manufacturing location: all products are developed and produced exclusively in Germany.
