

// FEATURES

- ❖ The smart card is used for identification in System 3060 to activate digital locking cylinders, SmartHandles, SmartRelays and SmartLocker.
- ❖ Manage up to 32,000 locking devices with a smart card and open doors and gates.
- ❖ In System 3060, MIFARE® DESFire® EV3 smart cards are the standard with a high level of AES-256 encryption. This is particularly advantageous if a company already has passive identification media that are used, for example, as company ID cards or for time-and-attendance recording.

// THE SMART CARD IS USED FOR IDENTIFICATION AND ACTIVATION IN SYSTEM 3060:

Digital locking cylinders

Digital SmartLockers
