SERVICE TECHNICIAN (M/F/D)

WHAT AWAITS YOU

- Responsibility for the implementation of technical support for installers, distributors and end customers regarding the use of our product and system solutions
- Technical project management and installation on-site, including quantity determination, documentation and topology determination for our network solutions
- Product, software and network trainings for partners and end customers
- General technical support of our partners
- Installation of software in server-client environments

WHAT SHOULD YOU BRING?

- Successfully completed technical formation (electrical engineering, IT specialist or systems IT specialist)
- Several years of relevant professional experience in electrical engineering, as service technician (m/f/d) and/or employee (m/f/d) in assembly or field service with customer contact
- Knowledge of databases, networks, operating systems, terminal service environments and VM technologies desirable
- High willingness to travel within Denmark and the Nordic countries
- Independent, autonomous work and very good analytical thinking
- Self motivated with a pro-active approach to problem solving
- Good knowledge of English, of other Nordic languages is an advantage
- Very good knowledge of the MS Office package

WHAT WE OFFER YOU

- The opportunity to contribute to the future development of a high-end product
- A varied and responsible task with a very high customer and service orientation
- Secure and permanent job in an innovative and internationally active high-tech company
- Good support through individual onboarding
- A respectful working environment where we have fun together and look after each other
- Close cooperation and collaboration with our experienced Nordic team
- Financial support for the costs of private sports activities
- Entertaining and action-packed company events
