SENIOR MIDDLEWARE STACK ARCHITECT (M/W/D)

WHAT YOU SHOULD EXPECT

- Development and implementation of software architectures and platforms as part of an agile development team
- Systematic expansion of our database-based cross-company architecture management system
- Systematic expansion of our cross-platform middleware stack
- Further development and maintenance of the crypto controller firmware of our secure element
- Creation of concepts for new functionalities, coordination and implementation including system tests and creation of corresponding documentation

WHAT WE ARE LOOKING FOR

- Successfully completed studies in electrical/communications/automation technology or a comparable qualification with several years of professional experience
- At least 4 years of practical experience with consistently object-oriented C++ programming
- Experience with security architectures and cryptology
- Experience with SQL databases
- Enthusiasm for agile development processes
- Good knowledge of German and/or English

WHAT WE OFFER

- Demanding and varied job with great scope for creativity in a growth market at one of the most innovative technology companies in Germany
- Future-proof job in a growing international company
- Personal and professional development supported by an extensive range of seminars and training courses
- Flexible working hours and an eye for a good life-work balance, 30 days of vacation
- Financial support for the cost of private sports activities
- Free drinks and fresh fruit
- Entertaining and action-packed company events

WHO WE ARE

SimonsVoss as the pioneer for ultra-low power electronic locking technology stands for the intelligent integration of functionality, aesthetics and uncompromising high quality Made in Germany.

Courage for innovation, sustainability, responsibility and the appreciation of our employees and partners are the foundations of our success.

SimonsVoss is a company of the ALLEGION Group and therefore a part of the globally active network.
